Yashwanth Arcot

GenAI Engineer | Python Backend Developer | RAG Systems | FastAPI | MongoDB Atlas Vector Search | LLM Applications
Bangalore Urban, Karnataka, India

Summary

Currently serving my notice period and actively seeking AI opportunities. Available to join immediately after completing my notice period. I am a GenAI Engineer with 1+ year of experience developing production-grade AI applications using Python, FastAPI, Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG). At Dealdox Software, I develop intelligent document processing systems, AI workflows, and backend services that integrate LLM capabilities with enterprise applications. My experience includes:

- Building RAG pipelines for document intelligence
- Developing FastAPI-based backend services
- Working with vector databases and semantic search
- Implementing AI agent workflows and conversational memory systems
- Integrating LLM APIs for automation and productivity solutions
- Designing scalable backend architectures using Python and MongoDB

I am passionate about developing reliable AI systems that solve real-world business problems and continuously expanding my expertise in Generative AI, AI Agents, backend engineering, and cloud technologies. Open to opportunities as:

- GenAI Engineer
- AI Engineer
- Python Backend Engineer
- LLM Application Engineer

Let's connect if you're building AI-powered products or looking for engineers passionate about LLMs, RAG, AI Agents, and scalable backend systems.

Experience

DealDox Software
Artificial Intelligence Developer
May 2025 - Present (1 year 4 months)
Bengaluru

- Built AI-powered document intelligence workflows using LLMs and RAG architecture, enabling intelligent search and automated information extraction from enterprise documents.
- Developed scalable FastAPI backend services integrating LLM APIs, retrieval pipelines, and AI workflows into enterprise applications.

- Implemented semantic search pipelines using MongoDB Atlas Vector Search and embedding models for context-aware document retrieval.
- Designed conversational AI workflows with memory management, maintaining context across multi-turn user interactions.
- Improved reliability of AI pipelines through debugging, optimization, and production monitoring.
- Optimized AI pipeline reliability through debugging, performance improvements, and production issue resolution.

Radical Innovations Group

Machine Learning Intern

January 2025 - April 2025 (4 months)

Collecting Data, Data Cleaning, Data Visualization, Machine Learning Model Training, Model Prediction

Education

Nedurumalli Bala Krishna Reddy Institute of Science and Technology

Bachelor of Technology, Artificial Intelligence and Data Science · (July 2021 - July 2025)
